

Hazardous Fuels Project Information Sheet

Quitcupah Road Piles Rx

Bureau of Land Management, Richfield Field Office

Contact Information: Todd Murray 435-896-1543
tmurray@blm.gov or Jill Ivie 435-896-1573 jivie@blm.gov

Planned Date: Fall – winter 2012

Planned Location: This project is located in Sevier County, along the Quitcupah Road right of way, near highway 10. Also, approximately 6 miles north of I-70 and 6 miles south of the town of Emery, Utah

Legal Description: Township 22 South, Range 5 East, Sections 20, 21, and 28.

Lat/Long: N 38 x 53' x 12.1"; W 111 x 21' x 46.9"

Project Description: Over the next few months, Nielson Construction under the direction of the Bureau of Land Management will be burning several slash piles along the Quitcupah road construction project, when weather conditions permit.

The Quitcupah Road Piles are within BLM managed lands of the Richfield Field Office. Piles of slash have been mechanically erected as a result of this project during the road pioneering phase.

The primary fuels treatment objective of this pile burn is to reduce the existing wildland fire hazard resulting from activity fuels - thus reducing potential negative effects from future wildland fire to surrounding administered lands.
